Fill out your retail shelves with the newest cosmetics offerings.

Smears from tears are mishaps of the past thanks to **Jane Iredale Dot the i**, a travel-friendly eye makeup remover featuring a cotton tip that fills with remover when snapped at one end, allowing for quick and easy cleanup.

Click, brush and go! The refillable, self-dispensing **Mineralogie DEMI Brush** makes on-the-go touch-ups a snap; carries up to six grams of her favorite Mineralogie powder; and features soft, goat hair bristles for gentle application.

With lipstick, *flattering* gets you far. **Susan Posnick Cosmetics Coloressential** lip color collection identifies the most universally flattering hue for each major color group (red,

berry, pink, coral, and nude), and delivers it in an antioxidant-rich formula. Bonus! A magnetic lid ensures no in-purse makeup slippups. (Shown: Milan red, NYC berry, Dallas pink, South Beach coral, and Dubai nude.)

It's the bee's knees for skin! Limited edition **Corevolution Hydrating Honey Glow Mineral Makeup** and **Honey Infused Mineral Eye Shadow** contain organic honey extract to hydrate and soothe with the added benefit of helping makeup better adhere. (Shown: Raw Honey Hydrating Honey Glow Mineral Makeup and Honeycomb Honey Infused Mineral Eye Shadow)

Reflect on this: **Mirabella Beauty Lip Reflect Polish** lends puckers a hint of candy-apple-

kissed shine with a formula that softens via sunflower seed oil and refreshes with peppermint extract.

That twinkle in her eye may be courtesy of **Xtreme Lashes Wishful Blinking Eye Shine**, a shimmer-packed liquid liner that contains eye-soothing calendula and chamomile extracts and is available in five shades, including sultry Arabian Night (shown).

Lipstick slips sink loose lips—unless she's primed with **gloMinerals gloLip Filler Pencil**. The liner-primer addresses feathering and fading by plumping fine lines with hydrolyzed wheat proteins and Vegetal Filling Spheres, as hyaluronic acid draws moisture into the lips and ceramide 3 supports renewal of the skin's natural protective layer.
